

MAZDA MX-5 AutoExe Pricelist

AutoExe
A New Driving Sensation

EXTERIOR

Part# MZ1V4900P00

Front Under Spoiler

₱57,786

The Front Under Spoiler emphasizes the MX-5's dynamic form. Incorporating ducting, it helps redirect air flow, reducing the air turbulence inside the front wheel well. Made of black-painted fiber-reinforced plastic (FRP).

Part# MZ1V1690P00

Carbon Seat Back Bar Bezel

₱31,712

Made of carbon fiber-reinforced plastic (CFRP)—the same material used in racing cars—it adds an authentic sporty appearance to the MX-5. The AutoExe logo adds an exclusive touch. Comes in a set of two.

Part# MZ1V9770P00

Wheel Nut Set

₱9,908

Add a subtle, yet sophisticated feel to your Mazda's wheels with these small diameter wheel nuts. The heptagonal design uses a special adapter wrench that prevents wheel theft. Made of high-strength chrome vanadium steel that does not loosen even at high temperatures, it is finished in black with a knurled red aluminum end cap.

Part# MZ7860P00

Street Sports Suspension Kit (KIJIMA-SPEC)

₱129,067

Based on the “Dynamic Kansai Engineer” theory of Takao Kijima—the development chief of Mazda sports cars and an authority in suspension tuning—it heightens driving feel and responsiveness by taking vehicle height, spring constant, and damping force all into account. The high-precision twin-tube design has a fixed damping rate, while the dedicated trapezoidal spring has excellent lateral rigidity.

Part# MZ7600P00

Front Sports Stabilizer

₱22,551

Constructed from a solid piece of aluminum, the front stabilizer bar measures 23mm in diameter and increases the front spring constant by 140%. Connecting the left and right suspension arms, it improves vehicle posture when cornering, while reducing the amount of body roll. Comes with dedicated rubber mounting.

Part# MZ7650P00

Rear Sports Stabilizer

₱21,141

Made of a hollow aluminum piece measuring 14mm in diameter, it increases the rear spring constant by 275%.

SUSPENSION

Part# MZ7605P00

Front Adjustable Stabilizer Link

₱14,799

Connecting the stabilizer and the damper, the Front Adjustable Stabilizer Link is indispensable for vehicles with a lowered ride height. It optimizes the suspension geometry by returning the angle of the lower arm to the appropriate level, thereby sharpening the responsiveness.

Part# MZ7X10P00

Upper Suspension Bush Set

₱18,964

With the rubber hardness increased by 146% and installed in 8 various locations, the Upper Suspension Bush Set enhances the communication between the car and driver. This is done by increasing the turn-in sharpness by minimizing the delay between steering input and response.

Part# MZ7X00P00

Lower Suspension Bush Set

₱45,735

Attached to 24 points around the car, the Lower Suspension Bush Set has 109% harder bushings. Because it handles the load from the road surface, it works to provide a more supple ride that suppresses unwanted vibration.

Part# MZ4500AP00

Front Strut Tower Bar

₱26,779

Made of a one-piece steel oval shaft with a welded bracket, the Front Strut Tower Bar connects the left and right towers, increasing overall rigidity.

Part# MZ4000P00

Rear Floor Cross Bar

₱22,691

The precise design allows the one-piece steel oval shaft to connect the left and right sides of the rear floor. By strengthening the suspension mounting points, it increases the overall stiffness of the body shell with almost no impact to the cargo space.

Part# MZ4800P00

Tower Brace Set

₱56,376

Made of a one-piece structure, the three-dimensional structure and special layout strengthens the entire body. It also disperses chassis stress during high-speed driving and cornering. It uses existing installation points as much as possible, while the rear center bar is removable when luggage loading is required. Weighs 8 kilograms.

Part# MZ4700P00

Member Brace Set

₱52,853

An advancement of the Rear Floor Cross Bar, the Member Brace Set also connects the left and right sides of the car, but over a wider area. This suppresses the twisting or distortion of the body, eliminating any change in chassis geometry, especially under load. A tough gusset is placed on the mounting area where load is the highest to distribute surface pressure. Ground clearance decreases 15mm upon installation. Weighs 7.5 kilograms.

Part# MZ2V5900P00

Ram Air Intake System

₱88,553

Improves the power and torque by pushing more air to improve the air/fuel mix ratio. The Ram Air Intake System is composed of a large-capacity carbon air intake box, specially-designed intake duct, and low-resistance K&N wet-type air filter. It comes with an adapter to install the airflow sensor.

Part# MZ9620P00

Intake Suction Kit

₱12,685

Made of multi-layer silicon and fiber-reinforced plastic (FRP), the Intake Suction Kit eliminates the flexible joint meaning air flows smoother through the intake and into the engine. The construction itself withstands deformation even at high engine loads. As an added bonus, the Crimson color and an AutoExe logo adds an eye-catching accent to the engine bay.

Part# MZ1V5800P00

Dual Sports Muffler

₱109,511

Eye-catching with an exciting sound to match—the Dual Sports Muffler features two 76mm outlets with a slash tail design. By changing to a straight structure, it reduces back pressure loss improving responsiveness and exhaust efficiency. And with no sound absorption material present, the sound produced is cleaner.

**Must be installed with Dual Sports Muffler Garnish*

Part# MZ1V3910P00

Dual Sports Muffler Garnish

₱29,598

Made by AES, this matte black garnish allows the installation of the Dual Sports Muffler. Removal and cutting of the rear bumper is required.

**Must be installed with Dual Sports Muffler*

Part# MZ8Y60P00

Dual Center Sports Muffler

₱103,732

By changing the muffling method from sound absorption to interference, the Dual Center Sports Muffler sees an improvement in engine output across the entire operating range. It features dual circular outlets measuring 90mm each.

**Must be installed with Dual Center Sports Muffler Garnish*

Part# MZ2400P00

Dual Center Sports Muffler Garnish

₱24,665

This garnish covers the notch of the stock muffler, while allowing for the installation of the Dual Center Sports Muffler. This black-painted impact resistant piece realizes a tight form typical of a lightweight sports car.

**Must be installed with Dual Center Sports Muffler*

BRAKES

Part# MZ5A10P00
Part# MZ5A20P00

Front Street Sports Brake Pads Rear Street Sports Brake Pads

₱14,207

₱12,685

Instead of focusing simply on stopping performance, the Street Sports Brake Pads are designed for consistent effectiveness of braking over time. It also produces a positive pedal feel allowing drivers to apply braking force that is natural and accurate. Works at temperatures from 0-400 degrees Celsius.

Part# MZ5B10P00
Part# MZ5B20P00

Front Club Sports Brake Pads Rear Club Sports Brake Pads

₱16,208

₱14,799

Designed for excellent controllability in high-load conditions such as race tracks, these brake pads have a much higher operating window (50-800 degrees Celsius). And with a material blended from carbon, it prevents brake fade by effectively coating the rotors.

Part# MZ560RP00
Part# MZ565RP00

Front Sports Brake Rotor Rear Sports Brake Rotor

₱63,170

₱63,170

Designed for high-performance driving, the two-piece Sports Brake Rotor offers improved resistance against brake fade and cracking. Eight cleaning slits prep the brake pads, while the black plating prevents rust build-up on the rotor itself. The duralumin housing with an alumite red center accent also improves handling by reducing unsprung weight.

BRAKES

Part# MZ5A50P00

Part# MZ5A56P00

Front Street Brake Rotor Rear Street Brake Rotor

₱28,188

₱28,188

These one-piece cast iron brake rotors feature a more robust construction with optimized levels of carbon and silicon. Together with careful heat treatment, it suppresses the brake distortion due to excessive heat. Six slits help clean the surface of the brake pads, helping improve brake effectiveness and stability even during prolonged high-stress use.

Part# MZ5410P00

Sports Brake Line

₱25,898

Made from stainless mesh Teflon®, the Sports Brake Line maintains a more direct pedal feel and less deterioration due to heat and expansion with repeated high-load use. The red PVC coating also helps protect the brake lines from debris. Gaskets are included for installation.

Part# MZ6700P00

Quick Shifter

₱25,898

AutoExe carefully examined the shifter lever ratio and inertia weight to come up with the Quick Shifter. With shift action that is 24% shorter, it is made to feel like the driver's palm is directly connected to the drivetrain. By eliminating the leaf springs and urethane bushings, shift shocks have also been alleviated. The shift stroke can be adjusted to the driver's preference.

INTERIOR

Part# MZ1970-03P00
Part# MZ1980-03P00

Driver Bucket Seat (TYPE-A7) Passenger Bucket Seat (TYPE-A7)

₱115,466

₱115,466

Made of high-rigidity fiber-reinforced plastic (FRP), these seats are designed to firmly hold the occupant even under strong lateral G loads. Uniquely, the side support is asymmetrical making it a perfect fit into the MX-5's tight interior. The seat, back, and lumbar cushions are removable for increased support on the race track. It is also compatible with standard 3-point seatbelts and racing harnesses. The seats are finished in fire-retardant PVC with a red center stripe and AutoExe logo.

**Must be installed with Driver Bucket Seat Rail and/or Passenger Bucket Seat Rail*

Part# MZ1975P00
Part# MZ1985P00

Driver Bucket Seat Rail Passenger Bucket Seat Rail

₱26,934

₱26,934

The dedicated seat rail allows the installation of the TYPE-A7 bucket seat on the production brackets. It also provides adjustments to the seat height with three steps of adjustment for the front and four steps at the back. It helps achieve a seating position that is 35mm lower.

**Must be installed with Driver Bucket Seat (TYPE-A7) and/or Passenger Bucket Seat (TYPE-A7)*

INTERIOR

Part# MZ1370-03P00

Nappa Leather Sports Steering Wheel

₱33,297

Inspired by the handle of a Katana, the Nappa Leather Sports Steering Wheel emphasizes usability and ease of grip. The cross section is slightly thicker (38mm from 33mm), while the diameter is smaller (358mm from 366mm) with a flat-bottom for improved leg clearance. Thumb grips at the 10:10 position enhances holdability, complemented by the dimpled finish to the Nappa Leather that prevents slipping. A Red Center Marker allows for intuitive operation, while the AutoExe logo is embossed on the flat bottom. It is compatible with the SRS airbag system, standard steering wheel switches, and paddle shifters.

Part# MZ41-03P00

M/T Leather Shift Knob

₱6,342

Operability and craftsmanship come together with the M/T Leather Shift Knob. The spherical shape, 51mm in diameter, allows it to be gripped either at the top or at the sides. An adjuster, fitted to the bottom of the shift knob, accommodates a range of physiques or preferences. The hand-sewn leather is topped off with sporty red stitching and an aluminum plate with a laser-etched AutoExe logo.

Part# MZ1700P00

Battery Clamp

₱5,552

Designed to resemble the strut tower bar, complete with the bright red steel construction and logo plate, it adds a sense of playfulness and character to the engine compartment.

Part# MZ1470P00

Helical Short Antenna

₱3,848

A sleek antenna replacement that seamlessly integrates with the antenna base. Measuring in at just 105mm in length and finished with an AutoExe logo, it offers a look that completes the MX-5's aesthetics.
